**1973-1976 Mopar A-Body Gen III Hemi
Engine Swap Transmission
Crossmember & Transmission Adapters**

NOW AVAILABLE

PRODUCT DESCRIPTION

[Click here for a direct link to the product webpage](#)

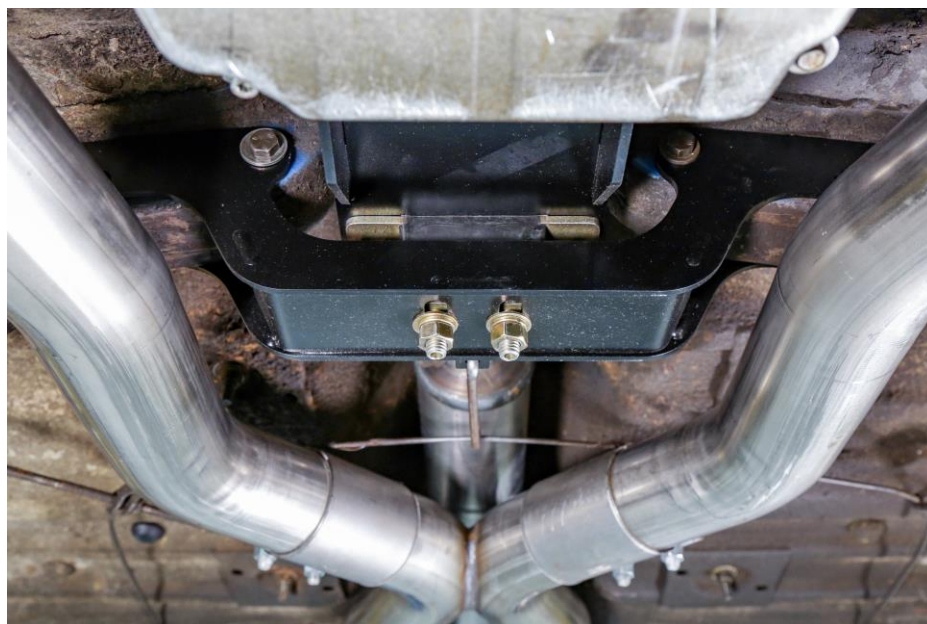

These Hooker BlackHeart crossmember & transmission adapters are one part of a fully engineered Swap System for the 1973-1976 Mopar A-Body. Each part of the swap system is designed to work together as a complete system along with the other components for an easy bolt-in installation.

Features/Benefits:

- Crossmembers Accommodate Popular A727, and Tremec TKX (GM Style) Transmissions (Automatic Transmissions Require Transmission Specific Adapter Plate)
- Uses the Factory Mounting Holes - for Easy Installation
- High Tuck Design to Maximize Ground Clearance
- Accommodates Up to 3" Exhaust
- Uses GM Style Transmission Mount - Hooker Part# 71223029HKR or 71223030HKR (Sold Separately)
- Modular Design with Bolt-on Transmission Adapter Allows Future Transmission Swaps without Replacing the Crossmember
- Welded Steel Construction w/ Black Coating for Great Looks and Durability
- Heavy Duty 3/16" Steel Construction - for Strength & Durability
- Includes Mounting Bolts & Instructions

Hooker BlackHeart transmission crossmember is part of the most comprehensive line of GEN-3 Hemi swap components available for the Mopar A-Body. Crossmember BHS572 allows the installation of the popular A727 3-speed with easy bolt-in installation and also allows installation of the popular GM style Tremec TKX 5-speed manual transmission. Use Crossmember support BHS588 for the Tremec TKX (GM style) manual transmission. Each Transmission uses an application specific adapter plate that is sold separately from the BHS572 crossmember. No cutting or drilling is necessary to install the crossmember just bolt it in the factory location using the supplied hardware. The modular design allows the use of several different transmission options without the need to buy or fabricate a different Crossmember - simply change to a different adapter plate and the driveline and u-joint alignment have been preset to the corresponding transmission. These Crossmembers are designed to use a popular and inexpensive GM style transmission mount for its compact design that allows for better ground clearance than the factory crossmember (Hooker part number 71223029HKR or 71223030HKR - sold separately). Solid 3/16" steel construction and black coated finish provides long lasting performance and good looks.

* Transmission tunnel and Torsion bar support modifications are required to install the BHS578 or BHS588 Crossmember support.
